

REINDIER (trio setup) 05-2015

A typical setup is 30 minutes, then soundcheck.

We will require a 2x1 metre table at DJ height (constantly 220V connected) If the table can be setup off-stage and carried on, we should be able to do 10-15 minute changeovers.

We take care of our own in-ears and mic's.

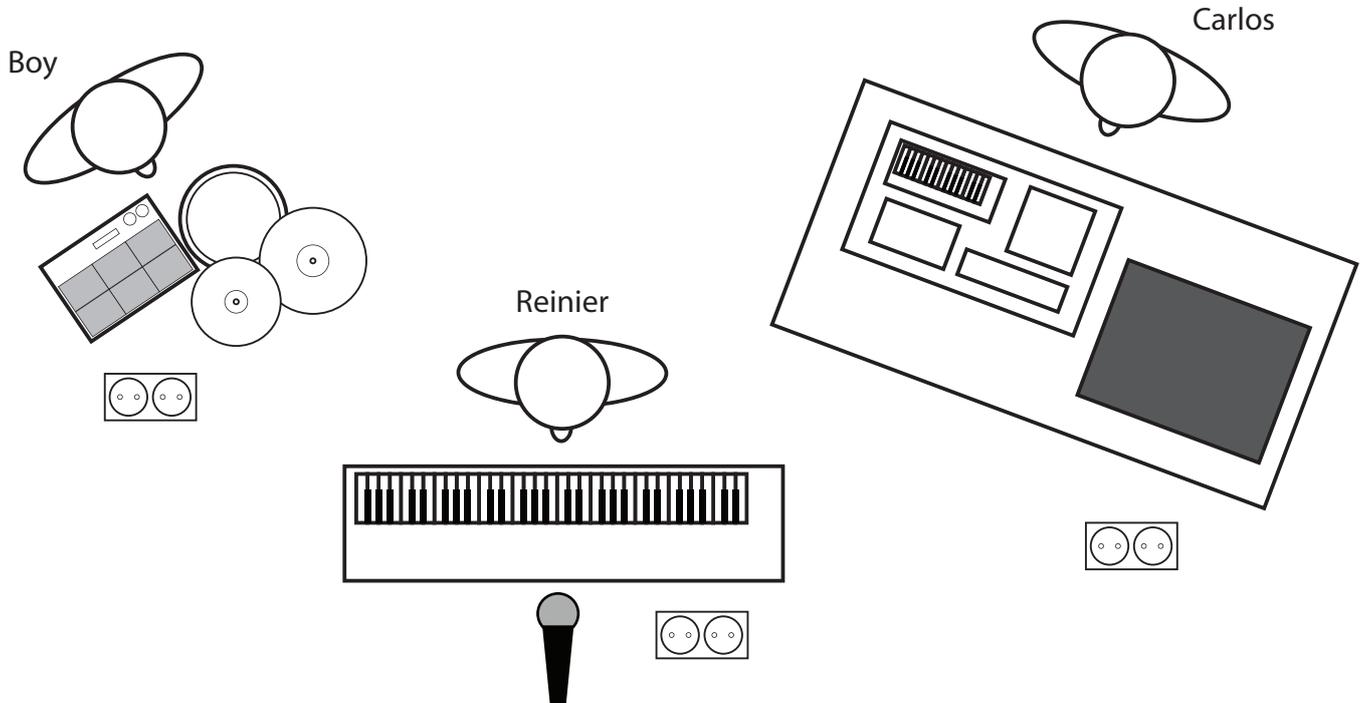

All outputs come from the laptop and are balanced line-level +4.
An iPad can be provided for the lap-top submix.
